

STABILISER TOWING RODS OPTIONAL FITTING TOOL INSTRUCTIONS

Before using your I.E.S. Stabiliser Towing Rods Fitting Tool please read the Stabiliser Towing Rods Fitting Instructions.

The Stabiliser Bar Fitting Tool is specifically designed to make the lifting of the stabiliser bars onto and off the hooks easier.

Fitting

1. Install Fitting tool plate onto trailer as shown in diagram, ensuring lip on plate is pointing up and securely located under the top Drawbar Hook bolt.

Operation

1. Locate large hook into plate on trailer (*see diagram*).
2. Hook smaller hook on stabiliser bar.
3. Raise / lower stabiliser bar with one hand and guide onto / off hook with the other.

Warnings

- § Never place hands between stabiliser bar and hook.
- § Do not place feet directly underneath the stabiliser bar when raising or lowering.
